That should not be a problem.

Andrew,

I would appreciate it if you can do it by Tuesday, July 16. Please let me know if you need more time.

Thank you,

Andrew ,

Can I get this back to you early next week?

Hello,

I understand that you are the DEC project manager for the site cited above. Alan Straus, former EPA employee, retired about 2 weeks ago. No EPA staff has yet been assigned to the case since. I would appreciate it if you can update the following paragraph concerning the site:

EPA had lead at this interim status facility under 3008(h) order from 1990-2006 at which the RFI was accepted. During this time, Bethlehem Steel declared bankruptcy and was purchased by ISG and then Mittal. Currently, ArcelorMittal has ownership and maintains environmental liability under Tecumseh Redevelopment Inc. NYDEC took over as lead in 2006 (RCRA and State Superfund). Large and technically challenging site located on shores of Lake Erie (500 acres, slag fill into the Lake Erie up to 100 feet in thickness, extensive GW contamination, estimated 1.5 million tons of waste, 43 SWMUS, 5 watercourses, etc.). Also, creation of a CAMU located on shoreline further complicated CMS. Some activities completed under phased approach under several consent orders (e.g., ATP slurry wall and cap with consolidation of 6 SWMUs, pump and treat system at Benzol Yard). FA of ~ \$34 M. Not all projects will be completed by 2020. Also, the brownfields program is designated over the remaining 500 acres and development is ongoing.

Thank you,

Andrew Park
